

CANADIAN PROCESS CONTROL ASSOCIATION

Why Buy from a CPCA Member?

CPCA is the Canadian hub of process automation companies that provides the knowledge and networking opportunities to help the industry thrive in an increasingly competitive environment. CPCA promotes the industry to customers, academia, and public bodies.

Our goal is to have a membership that is strong and involved while keeping it uniquely Canadian.

CPCA Members common goals are to bring the best quality, certified products to the Canadian process market and to stay on top of leading-edge technologies.

We provide a forum to exchange technical, industry and regulatory information, develop industry statistics, and encourage professional and ethical behavior and quality standards among its members.

As the leading source of Canadian market information, CPCA members are better able to make strategic decisions by being more aware of how their business is doing compared to the overall Canadian process market.

We encourage professional and ethical behavior and quality standards among members; and offer ongoing training on aspects ranging from sales management and industry standards to new technologies. CPCA members provide reliable products, exceptional service, and knowledgeable support.

We ensure the competitiveness of members by working with Certification Bodies and other regulatory authorities to expand capabilities of suppliers and ease restrictiveness of regulations.

Membership also allows many opportunities to expand your business: Networking with manufacturers and distributors from across the country is the best way to form new relationships and promote your company to industry leaders. Our Annual General Meeting is the industry standard for exceptional keynotes from leaders in the process and economic industries while allowing members to connect in an informal environment.

CPCA offers members multiple ways to get involved, which can benefit you and your company. Being an active participant in CPCA keeps you up to date on the latest industry news, innovations, and improvements for our industry.

It has never been truer that we are stronger together. By sharing information and best practices, members are far better armed to weather tough circumstances, including the current pandemic. Not a member? Get involved now!
